**FOR IMMEDIATE RELEASE**

## **Nasiff CardioHospital<sup>®</sup>**

CENTRAL SQUARE, NY: March 1, 2017—The Nasiff CardioHospital<sup>™</sup> allows medical professionals to securely perform medical tests, allowing patient data to be read by other medical professionals and having the results sent back to them or any one they choose. For example, if a technician performs an ECG and wants a Cardiologist to interpret or over-read it, they can send the test to a Cardiology professional that will read and interpret the data then send a signed result report. CardioHospital<sup>™</sup> is a cloud based system allowing you to securely view your CardioCard<sup>®</sup> patient's test data in real-time for immediate review. This enables you to manage your patient's data and care from anywhere in the world.

The Nasiff CardioHospital<sup>™</sup> is functionally seamless and built-in into the CardioCard<sup>®</sup> Software, there is no additional software required. Users desiring to use the Nasiff CardioHospital<sup>™</sup> need to be running CardioCard<sup>®</sup> version 6.30 or higher and sign up for the program.

- **FAST AND EASY TO USE**
- **INEXPENSIVE**
- **SECURE SOFTWARE**

### **If you are a CardioCard<sup>®</sup> Test Collector:**

Perform Resting ECGs, Stress ECGs and Holters with Nasiff CardioCard<sup>®</sup> devices at any location, upload data to a secure central location and receive results from a certified physician or a medical professional of the collector's choice.

### **If you are a CardioCard<sup>®</sup> Test Data Reader:**

Download Resting ECGs, Stress ECGs and Holters from any location and upload test results to a secure central location. Over-readers include: certified cardiologists, other physicians/technicians. (if you only read data, devices are not required, only the CardioCard<sup>®</sup> Software and an account that has been established and pre-approved)

Please contact Nasiff Associates, Inc. for additional information and the distributor nearest to you.
