

Nasiff CardioCard®

PC BASED CARDIOHOSPITAL

Real-time monitoring
Anytime... anywhere
Easy to Use

CardioCard® Test User

Cloud Based

Affordable
Give or get comprehensive second opinions quickly and easily

CardioCard® Data Reader

CardioHospital™ —
we care about you and your patients

CardioHospital™ will allow medical professionals to securely perform medical tests, have Patient Data read by other medical professionals and have the results sent back to them or any one they choose. For example, if a technician performs an ECG and wants a Cardiologist to interpret it, they can send it to a Cardiology professional that will read and interpret the data then send a signed result report. CardioHospital™ is a cloud based system which allows you to securely

view your CardioCard® patient's test data in real-time for immediate review. This enables you to manage your patient's data and care from anywhere in the world.

Reliable and user-friendly. Compact and portable. Performs and manages tests fast and easy at the point-of-care.
